CI

PIKO CI: Smart Power – Optimised costs and high levels of safety

Smart Project Design

Optimised generator design with system voltage of up to 1100 V

Integrated KOSTAL Smart AC Switch takes the place of the external circuit breaker

Simple DC installation at an attractive cost without any string distribution boxes

Generator is disconnected on site by integrated DC voltage separator

Over-assignment of up to 50% (DC to AC) permits flexible generator design

Smart Performance

Maximum energy yield thanks to high certified efficiency (>98%)

In the event of an error, individual strings are shut down to maintain high availability

The connected PV strings are monitored in pairs for optimum monitoring and service

Integrated, certified grid service functions ensure reliable operation

Smart Connected

Simple communication (daisy chain) via dual LAN interface (RJ45) with integrated switch

Tried and tested communication via RS485 bus integrated as standard

Compatible with many plant controllers and data loggers, so you can use the monitoring system you prefer

Trouble-free use in direct marketing thanks integrated feed management

Integrated data loggers back system information up at all times

Smart Installation

Optimum protection from dust and water for tough outdoor use (protection class IP65)

Low weight for simple transport and installation

Quick, uncomplicated, and tool-free AC and DC installation

Protection against overvoltage on the AC and DC side

Cost-optimised 4-wire AC connection, no neutral wire
